a touch of elegance

Congratulations on choosing your new house. Your new home has been designed with the latest specification to provide you and your family with a lifetime of pleasure.

With so much already, why not consider adding a conservatory to add that finishing touch of unashamed elegance to your new home? Choosing a conservatory now could save you thousands of pounds in the long term both in the initial cost and in adding value to your home. A conservatory also makes a wonderful place to entertain and is the perfect link between your home and garden.

expand your horizons...

Choosing a Speed Frame conservatory now will expand your horizons by allowing extra light and space into your home. Ordering now will ensure a perfect match with the bricks, mortar and windows of your home and you can include the cost in your mortgage application, saving time and money.

Buy now and you will also save the 17.5% VAT cost, which is a saving of £1,750 on a conservatory costing £10,000! Plus, your conservatory will be covered by the NHBC Buildmark Warranty – the same as your home! Choosing the conservatory option today rather than after legal completion tomorrow also avoids

the disruption and mess caused by building work in the future - leaving you free to enjoy your enlarged new home from day one. Choosing the ultimate home improvement from Speed Frame offers individuality from the outset, with a conservatory designed exclusively to compliment your new home.

styles

glass products

24mm IGU's, Low-e argon filled toughened units.
With TPS (Thermo Plastic Spacer) system, which gives Speed Frame "real" warm edge technology, TPS also provides improved insulation at the edge zone, a more even temperature distribution over the glass surface which considerably reduces condensation and improves the 'U' value resulting in energy cost savings for the home owner.

roof

BBA Certificated roofing system
25mm multi walled polycarbonate available in Clear, Bronze & Opal
the roof has PVC-u thermally clad aluminium glazing bars
Standard 20° pitch

u-values

What is a U-value? A U-value measures the efficiency of heat loss from within the home. The government has set this standard for windows and doors at 1.8 Wm²K (watts per metre square kelvin). Speed Frame Windows and doors have a U-value of 1.5 Wm²K resulting in energy cost savings for the home owner.

how to order

Trust Speed Frame to give an excellent conservatory backed up by a top quality customer support service. Now its your turn to choose Speed Frame for your home. Simply speak to one of the site sales team.
